

*BioNike*  
HEALTH AND BEAUTY

For the sake of sensitive skin

ICIM International is an Italian company founded in Milan in the 1930s as a pharmaceutical business. Today, the company is becoming ever more popular in Italy and foreign markets thanks to its BioNike brand.

BioNike, which means "Victory of Life", is a dermatological brand that strives to make effective products that are highly tolerated by skin, for the wellbeing of skin, even the most sensitive.

**After perfecting its expertise over the last years**, the company now makes a broad range of products based on the so-called **"free-from philosophy"**

According to this philosophy, all BioNike products in the TRIDERM, DEFENCE, PROXERA and SHINE ON ranges are nickel-tested and **free from those substances** that the dermatology literature identifies as the most frequent causes of **contact allergies: preservatives, fragrances, gluten.**

## NICKEL TESTED

*i* FREE FROM PRESERVATIVES · FRAGRANCES · GLUTEN

**NICKEL TESTED** - Also residual nickel content can trigger allergic reactions or sensitisation, especially in allergy-prone subjects. Thus, each production batch is analysed to ensure a nickel content lower than 0.00001%.

**FREE FROM PRESERVATIVES** listed in Annex V of Regulation EC No. 1223/2009;

**FREE FROM added FRAGRANCES;**

**FREE FROM GLUTEN** - Does not contain gluten or its derivatives. This indication is provided to enable subjects with non-celiac gluten sensitivity to take an informed decision.
